

WHAT IS CLAIMED IS:

Sub 7
C1
5 1. A woven textile prosthetic implant comprising:
an elongate tubular body formed of fabric having
a fabric thickness no greater than about 0.16 mm, said
tubular body having longitudinally spaced wave-like,
generally uniform crimps along the length thereof, said
crimps having a crimp frequency of no less than about 6
crimps per centimeter.

2. A woven textile prosthetic implant of claim 1
wherein said tubular body includes an x-ray detectable,
radiopaque yarn therein.

3. A woven textile prosthetic implant of claim 2
wherein said radiopaque yarn extends longitudinally along
the length of the tubular body.

4. A woven textile prosthetic implant of claim 1
wherein said wave-like crimps have a peak-to-peak amplitude
of no greater than about 0.5 mm.

5. A woven textile prosthetic implant of claim 1
wherein said body has a fabric thickness of about 0.12 mm
and a maximum crimp frequency of about 42 crimps per cm.

Sub 7
C2
5 6. A woven textile graft comprising:
an elongate tubular graft body having a wall
thickness of no greater than about 0.16 mm and defining a
pattern of wave-like crimps along said body, the number of
crimps, C per centimeter of body length being defined by the
equation:

$$C = [2 (t + 10)]^{-1} ;$$

wherein t equals the body wall thickness in mm.

7. A woven textile graft of claim 6 wherein said wave-like crimps define a peak-to-peak amplitude of no greater than about ^{0.5}~~0.6~~ mm.

8. A woven textile graft of claim 7 wherein said tubular body includes a radiopaque marker therein.

9. A woven textile graft of claim 8 wherein said marker extends the length of said tubular body.

10. A woven textile graft of claim 1 wherein said tubular body is bifurcated.

11. A woven textile intraluminally implantable graft comprising:

an elongate tubular graft body having a wall thickness of dimension such that the graft body may be readily compressed for insertion into a delivery catheter;

said tubular graft body having a plurality of longitudinally spaced wave-like crimps along the length thereof;

said tubular graft body including a plurality of wave-like crimps along the length of said tubular body, said wave-like crimps defining a crimp of no less than 8 crimps per cm.

12. A woven textile graft of claim 11 wherein said wall thickness is no greater than about 0.16 mm.

13. A woven textile graft of claim 12 wherein said wave-like crimp has a crimp pattern with a crimp frequency no less than 8 crimps per centimeter.

14. A woven textile graft of claim ¹²~~13~~ wherein said crimps have a generally uniform peak-to-peak amplitude not exceeding about ^{0.5}~~0.6~~ mm.

¹⁴
~~15.~~ A woven textile graft of claim ¹³~~14~~ wherein said tubular body includes a radiopaque marker therein.

¹⁵
~~16.~~ A woven textile graft of claim 11 wherein said tubular body may be compressed for insertion into an endoluminal catheter.

¹⁶
~~17.~~ A woven textile graft of claim 11 wherein said tubular graft body is bifurcated.
